

## **The Diamond Glow Experience**

### **Are you ready for compliments?**

*"Your skin looks amazing!" -- Family*

*"I love how soft your skin feels! You are glowing!" -- Friends*

Prepare yourself for a radiant, glowing facial like no other! Friends and family will repeatedly gravitate towards you and compliment your dewy, soft skin.

### **What is a Diamond Glow Facial?**

Diamond Glow, the Cadillac of facials, is a treatment that uses new technology to remove debris from clogged pores and, at the same time, replaces open pores with a serum, leaving skin noticeably softer and radiant. Experience a dewy glow afterward when fine lines around the eyes, above and between the brows, and around the mouth soften. The results are noticeable instantly.

### **How is a Diamond Glow Facial different?**

The Diamond Glow facial uses an innovative tool that provides light dermabrasion over the skin surface, gently lifting away dead skin cells and clogged pores. A healing serum plumps skin cells and transforms the skin's surface with a mild glow. Instantly, skin is visibly brighter and softer to the touch. Results last for weeks.

### **What are the 3-in-1 benefits of Diamond Glow technology?**

- Diamond Glow gently exfoliates dead skin cells from the top skin layer to reveal healthy skin.
- During the deep cleaning process, Diamond Glow removes debris from clogged pores.
- Skin rejuvenation begins with a SkinMedica serum infusion into fresh pores.

### **How long do Diamond Glow results last?**

- Upon initial completion, Diamond Glow improved skin dryness, and overall radiance was significantly noticeable.
- Within three days, Diamond Glow patients experienced ongoing relief from skin roughness and dryness, diminished fine lines, and long-lasting radiance was prominent.
- Within three months, Diamond Glow patients showed improved skin tone unevenness, overall roughness, and a significant reduction in hyperpigmentation and photodamaged effects. Skin remained radiant and soft.

**What are the benefits of multiple Diamond Glow treatments?**

- After one Diamond Glow Facial, skin appears clear and glowing. SkinMedica Clarifying Pro-Infusion Serum plumps skin cells, making them look soft and luminous. SkinMedica Skin Brightening Pro-Infusion Serum works around the eyes and lips, lessening fine lines for a youthful appearance.
- Three consecutive treatments showed continued results. In six weeks, three Diamond Glow treatments, performed every two weeks using SkinMedica Skin Brightening Pro-Infusion Serum, resulted in noticeably reduced redness and hyperpigmentation around the nose and cheek areas.
- Six consecutive treatments showed noticeable changes. In twelve weeks, after six treatments performed every two weeks with SkinMedica HA5 Hyaluronic Serum, skin tone texture and evenness dramatically improved.

**Will the Diamond Glow tip hurt my face?**

The Diamond Glow dermabrasion process uses a variety of diamond tips targeted for the face yet sensitive enough for the eye and lip areas. The combination of strengths shows improved results during the exfoliation process. We strive to make your comfort a priority.

**Which serums are appropriate for my skin concerns?**

Skin Medica Pro-Infusion Serums work with you in mind. Each Blend contains a combination of specialized ingredients designed to help address your skin concerns.

- SkinMedica TNS Advanced Serum combines a growth factor to help refresh skin and return it to its original glow.
- Skinmedica HA Hyaluronic Acid Serum contains a custom mixture of five specialized Hyaluronic Acids to replenish hydration and soften skin.
- SkinMedica Skin Brightening Serum helps improve signs of uneven skin pigmentation.
- SkinMedica Vitamin C Serum contains antioxidant protection to help improve the look and feel of skin.
- SkinMedica Pore Clarifying Serum improves acne-prone skin, making skin appear clear.

**What's the difference between the Diamond Glow Facial and the Diamond Glow Treatment?**

The Diamond Glow Facial includes:

- A mask and under-eye treatment
- Diamond Glow Treatment
- Custom Facial
- Hot towels
- Gentle massage: face, neck, décolleté, arms and hands
- Moisturizer with SPF

**The Diamond Glow Treatment includes:**

- Removing any makeup
- Diamond Glow Treatment
- Hot towel
- Moisturizer with SPF
